

Logina Esmaeil

Junior Software Engineer

Giza, Egypt | logyesmail3@gmail.com | +201147403045 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile

experience in building web and mobile applications using React, Next.js, and React Native. Experienced in API integration, responsive UI development, and delivering scalable applications in Agile environments. Currently serving as a Web Development Instructor, mentoring students in web technologies and guiding them through real-world projects. Passionate about problem-solving, software engineering best practices, and continuous learning.

Work Experience

Web Development Instructor (Part-Time, Remote) - iSchool

Mar 2026 – Present

- Deliver hands-on training in HTML, CSS, and JavaScript
- Simplify complex programming concepts for students
- Guide students in building real-world projects

Internship

Frontend & Cross-Platform Developer Trainee – ITI

Jan 2026 – Jun 2026

- Developed production-ready web and mobile applications.
- Worked within Agile development environments.
- Participated in debugging, testing, and feature enhancement.

Projects

HireReadyAI | [React Native](#), [React.js](#)

AI-powered recruitment platform featuring automated CV evaluation, AI-driven interviews, and intelligent job posting generation. Built the majority of the cross-platform mobile application, implemented the end-to-end job application pipeline, and integrated Hugging Face models for automated CV parsing and candidate evaluation.

[LUMINA](#) | Next.js, Context API

Full-featured luxury e-commerce platform with dynamic data handling, state management via Context API, and optimized rendering using Next.js SSR/SSG.

[MovieVerse](#) | React.js, REST API

Dynamic React application consuming a third-party REST API for real-time movie data and search.

[Memory Game](#) | TypeScript, Bootstrap

Interactive game with type-safe TypeScript logic, demonstrating OOP patterns and clean architecture.

[ShopMax](#) | HTML5, SASS

Scalable e-commerce frontend with SASS modular architecture, mixins, and nesting best practices.

[Beauty Glow App](#) | React Native, Expo, REST API

Cross-platform mobile application utilizing the Makeup API to fetch and display products in real-time.

Implemented advanced search filtering, dynamic routing via React Navigation, and persistent local storage using AsyncStorage for a personalized favorites list.

[Smart Garbage Classification System \(Graduation Project\)](#) | Python, AI/ML

AI-based waste classification system that distinguishes between plastic, organic, and metal waste with a real-time prediction interface. Improved sorting efficiency and supported sustainability goals.

Education

King Salman International University – B.Sc. Computer Science, Software Engineering

Sept 2021 – Jul 2025 | GPA: 3.2 / 4.0

Technical Skills

- **Programming Languages:** C++, Python, SQL, JavaScript (ES6+), TypeScript, Dart
- **Frontend Development:** HTML5, CSS3, SASS, React.js, Next.js, Tailwind CSS, Bootstrap, MUI
- **Mobile Development:** Flutter, React Native
- **Backend & BaaS:** Firebase, Supabase
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SOLID Principles, Design Patterns, Problem Solving
- **Development Practices & Tools:** Git, Docker, Agile/Scrum, Progressive Web Applications (PWA), Responsive Web Design

Languages

Arabic: Native

English: Intermediate **(B1)**
